

ministrEspce Event Provider

BENEFITS

- All HVAC schedules entered in one place
- Scheduling system (ministrEspce) is cloud based
- Transparent scheduling of energy and security for the rooms
- Saves energy and scheduling labor

SUPPORTED PRODUCTS

- ministrEspce
- COOL SPACE

SYSTEM REQUIREMENTS

- HTTP web connection to ministrEspce.com from the Events2HVAC application

ministrEspce Scheduling System

ministrEspce is the easiest-to-use room/event/resources scheduling solutions on the market today. Schedule spaces, resources and human interaction associated with an event. ministrEspce is 100% web based and its PRO version provides for unlimited users. Eliminate double booking of spaces as well as the bottle neck of a single person controlling the calendar.

Features include:

- Single source for all space scheduling needs
- Multiple User access from any web access point
- Public and private calendar views
- Display public calendars on website
- Communicates with faciliitEspce software
- Easy Set up

Events2HVAC ministrEspce Event Provider

The ministrEspce event provider is a software component that links your schedules in the ministrEspce web application your facility's Events2HVAC application server. Events2HVAC periodically queries the ministrEspce reservations at custom intervals to determine the events that are scheduled for the day and which rooms will be used for those events.

Events that are using rooms that have been mapped to specific equipment in Events2HVAC will automatically create command actions to be executed when

those events take place.

This component also provides on-demand access to the event schedule information so that Events2HVAC users can see the event calendar without direct access to the ministrEspce web client.

The ministrEspce event provider component was specifically designed to interface to the ministrEspce web site.

Action Triggers

Events2HVAC uses event triggers to initiate actions in the BAS/HVAC systems. These triggers are dictated by your reservations entered in ministrEspce and their event start and stop times.

Here's how ministrEspce event time fields correspond to Events2HVAC triggers:

ministrEspce Fields	Events2HVAC Triggers
Event Start	Event Start—not currently supported, event start includes setup time
Event End	Event Stop—not currently supported, event stop includes teardown time
Setup Time	Event Setup Start
Teardown Time	Event Teardown Stop
